## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-29 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-29, respectively, of U.S. Patent No. 6,608,818. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Regarding claims 1-29, the present application differs from the Patent in that the Patent is directed to a method including a plurality of steps for transmitting a stream of information, while the present application is directed to an apparatus including a plurality of means for the corresponding steps (functions) of the Patent.

It would have been obvious to one having ordinary skill in the art to incorporate an apparatus comprising a structure corresponding to each step to perform the method for the steps.

***Allowable Subject Matter***

3. Claims 1-29 would be allowable if a terminal disclaimer signed by the assignee in accordance with 37 CFR 3.73(b) is filed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach conducting an RLP communication session using the RTT estimate to determine NAK message timing in specific combination as recited in claims 1 and 22.

***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Soon D. Hyun whose telephone number is 571-272-3121. The examiner can normally be reached on M-F.
